

1) Name : Kittithas Mitreevej 6230043321

2) REST API curl command or URL address to enter at the web browser

<https://www.instantwebtools.net/fake-rest-api> This is an Online Fake REST API for testing REST application or checking how modern REST API's work.

The screenshot shows a web browser window with the title "instantwebtools.net" and the sub-page "Fake Rest API | Instant Web Tools". The main content is a table listing various REST endpoints:

Endpoint	HTTP Method	Description	Actions
https://api.instantwebtools.net/v1/airlines	GET	Read all airlines details.	🔗 ⚙️
https://api.instantwebtools.net/v1/airlines	POST	Create airline data.	🔗 ⚙️
https://api.instantwebtools.net/v1/airlines/:id	GET	Read airline by airline ID.	🔗 ⚙️
https://api.instantwebtools.net/v1/passenger	POST	Create passenger using correct passenger data.	🔗 ⚙️
https://api.instantwebtools.net/v1/passenger/:id	GET	Read passenger by passenger ID.	🔗 ⚙️
https://api.instantwebtools.net/v1/passenger/:id	DELETE	Delete passenger by using passenger ID.	🔗 ⚙️
https://api.instantwebtools.net/v1/passenger/:id	PATCH	Update passenger name with correct passenger ID.	🔗 ⚙️
https://api.instantwebtools.net/v1/passenger/:id	PUT	Update every detail of a passenger.	🔗 ⚙️
https://api.instantwebtools.net/v1/passenger?size=10	GET	Read all passengers. This endpoint supports pagination	🔗 ⚙️

Showing 1 to 9 of 9 entries

In this case, /airlines , /airline/:id , /passenger/:id and /passenger?page=0&size=10 were used.

/airlines

URL address: <https://api.instantwebtools.net/v1/airlines>

/airline/:id

URL address: <https://api.instantwebtools.net/v1/airlines/1>

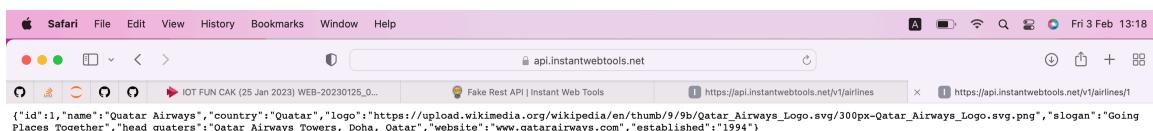

/passenger?page=0&size=10

URL address: <https://api.instantwebtools.net/v1/passenger?page=0&size=10>

3) Example output data

/airlines

/airline/:id

The screenshot shows a browser window with the address bar set to <https://api.instantwebtools.net/v1/airlines>. The page content displays a single airline record in JSON format:

```
{"id":1,"name":"Qatar Airways","country":"Qatar","logo":"https://upload.wikimedia.org/wikipedia/en/thumb/9/9b/Qatar_Airways_Logo.svg/300px-Qatar_Airways_Logo.svg.png","slogan":"Going Places Together","head_quarters":"Qatar Airways Towers, Doha, Qatar","website":"www.qatarairways.com","established":1994}
```

/passenger?page=0&size=10

4) Describing the data obtained

/airlines provides all airlines data which includes id, name, country, logo (link to the png. file), slogan, headquarters location, website and the establishing year

`/airline/:id` provides the same data as `/airline`, but only for the specific airline by ID.

/passenger/:id and /passenger?page=0&size=10 were used

id, name, trips, airline, country, name of the airline they used and the logo, slogan, head quarters location website and establishing year of the airline.

5) URL linking to the REST API reference document for the public data obtained.
